Character design:

Girls are a primary yellow and the more yellow they are the more attractive they are to guys. Off-yellow is the most common.

Characters are all variations of the main character, tall, thin, fat, different colours, big faces, low faces, long arms, big feet, unique facial textures, longer fur, etc...

Females all fall within a specific range of variations, and men's variations are in a different range. E.g. girls are all coloured around the colour yellow and men vary around red or blue. Males all have big blocky feet; girls all have smaller rounded feet. Females have more facial make up, and males have bold patterns.
